SUMMARY

I am a dedicated web developer with experience in .NET, C#, ReactJS, and TypeScript. I am passionate about delivering high-quality results through continuous learning and collaboration. My enthusiasm and teamwork skills allow me to make significant contributions to any project.

EXPERIENCE

06 2023 - nuvarande   **Frontend Developer, Nibe AB, Markaryd**

- Designed and implemented a design system using Storybook and TypeScript to standardize graphic patterns, improving consistency and maintainability.
- Optimized existing React components for more generic usage and improved performance, enhancing user experience and code efficiency.
- Created a new component within the Sitevision CMS for seamless integration, simplifying content management and workflow.
- Collaborated closely with backend developers to implement new MongoDB, and GraphQL queries and connectors, ensuring efficient data flow and communication between front-end and back-end.

01 2023 - 04 2023   **Fullstack Developer, Qiwio AB, Halmstad**

- Implemented an analytics dashboard using React and TypeScript to visualize user statistics, providing valuable insights for decision-making.
- Integrated ChartJS for advanced data visualization capabilities on the analytics dashboard, enhancing the presentation and understanding of complex data.
- Fixed frontend styling issues with TailwindCSS and improved UI/UX across multiple components, optimizing user experience and visual appeal.

09 2022 - 11 2022   **Fullstack Developer, Qiwio AB, Halmstad**

- Developed C# backend services to aggregate, compute, and deliver data for front-end consumption, ensuring efficient and reliable data processing.
- Revised the existing authentication system in the ASP .NET backend to improve security and efficiency, enhancing user security and system performance.
- Created RESTful web services using ASP.NET to enable real-time data sharing between server and client, facilitating dynamic and responsive applications.

04 2019 - 08 2021   **Assembler, Nibe AB, Markaryd**

- Worked as an assembly worker in manual assembly, gaining hands-on experience in production processes and teamwork.

07 2016 - 12 2018   **Application Specialist, Loomis Turkiye, Istanbul**

- Tested the company's software to ensure proper functionality, contributing to quality assurance and user satisfaction.
- Created user guides to facilitate efficient use of the software, improving user understanding and adoption.
- Offered support to users who encounter software problems, ensuring smooth user experience and problem resolution.
- Collaborated with the development team to improve the software based on user feedback and needs, fostering a user-centric development approach.

12 2013 - 05 2016   **Printing and stationery, Own business, Istanbul**

- Established a company that traded in printed and paper products on the market, showcasing entrepreneurial skills and market knowledge.
- Managed sales to both private and business customers at the physical retailer, demonstrating customer service and sales expertise.

EDUCATION

08 2021 - 05 2023   **Web developer within .Net, EC Education, Halmstad, Associate Degree**

- Gained extensive knowledge and developed web applications using .Net, C#, JavaScript frameworks and libraries, demonstrating practical skills and technical proficiency.
- Implemented containerized applications using Docker for streamlined development and deployment, improving efficiency and scalability.
- Leveraged Azure for cloud-based development and deployment of microservices, showcasing cloud computing expertise.
- Practiced agile methods to improve team collaboration and project management, demonstrating adaptability and teamwork skills.

2008 - 2012   **Computer technologies and systems, University of Food Technologies, Plovdiv Bulgaria, Bachelor Degree**

- Learned how to apply theoretical foundations in information and computer technology, demonstrating a solid understanding of computer science principles.
- Mastered methods and tools for information flow processing and their integration into manufacturing processes and technologies, showcasing the practical application of knowledge.

TECHNICAL SKILLS

- **Programming Languages:** .NET, C#, JavaScript, NodeJs
- **Frameworks and Libraries:** ReactJS, Vite, Storybook, TailwindCSS, MaterialUI, ASP.NET, Jest
- **Databases:** MongoDB. MSSql, PostgreSQL, MySql, Google Cloud FireBase
- **Cloud Platforms:** Azure
- **Version Control:** Git
- **Agile Methodologies**: Scrum
